**Overview** In 2020, 5280 cases of chlamydia were reported in WV.

*By Sex:* Women made up 68.7% (3,626) of all cases, and men made up 31.3% (1,654).

*By Age:* People aged 20-25 accounted for 45.3% (2,391), which was the most cases among any age group.

*By Race/Ethnicity:* White non-Hispanic people had the most cases at 54.6% (2,871). However, Black people had the highest rate at 971 cases per 100,000.

*By Geography:* The majority (33.9%) of all chlamydia cases resided in Cabell, Kanawha, or Monongalia counties.*

*The patient’s county of residency is used to determine infection rates. Institutions such as colleges, prisons, and shelters may affect these numbers, as the patient is a temporary resident of that county.\*\*
