

Harm Reduction Program Statewide Report

January to March 2019

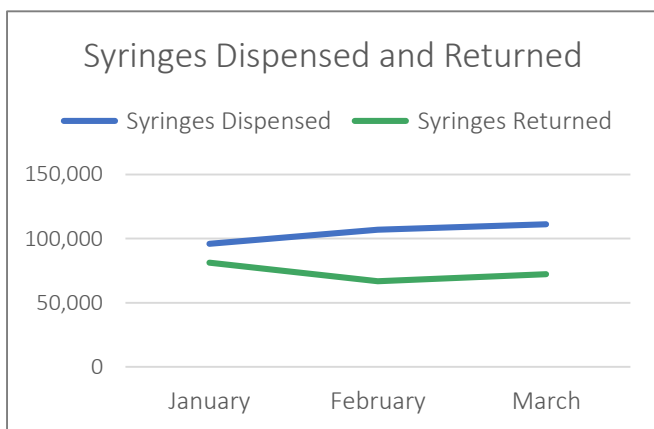

Harm reduction is a comprehensive set of public health strategies that aim to reduce sickness and death among people who inject drugs. Data were reported by eighteen harm reduction programs this quarter.

Educational materials were distributed to participants at **5,114 visits** this quarter.

70% of syringes dispensed statewide between January and March were returned.

263 participants were referred to treatment between January and March 2019.
