## **Outbreak Report for July 2019 West Virginia**

During the month of July 2019, there were six outbreaks reported in West Virginia. All were confirmed as outbreaks or clusters of disease. Four were reported from healthcare facilities, one from a daycare, and one from a community.

All healthcare-associated outbreaks were reported from long-term care facilities (LTCF).

The rest of this report describes the types and settings of the outbreaks. All data provided is provisional.

### **Outbreak Report for July 2019 West Virginia**

The West Virginia Department of Health and Human Resources, Bureau for Public Health (BPH) continues to investigate cases of hepatitis A in the state as part of the multi-state outbreak that is occurring nationally. Persons who use injection and non-injection drugs, persons with unstable housing or who are homeless, persons with recent history of incarceration, and men who have sex with men are considered at considerable risk for infection. Vaccination of high-risk groups continues to be an important strategy in preventing new cases. Additional information on this outbreak, including the current number of cases, can be found at <a href="https://www.hepawarewv.org">www.hepawarewv.org</a>.

For information on outbreak guidelines or any disease or condition, please visit the Division of Infectious Diseases Epidemiology's website at <a href="https://www.gov">www.dide.wv.gov</a> or call (304) 558-5358 ext. 1, or toll-free in West Virginia 1 (800) 423-1271 (24/7/365).

Remember that outbreaks should be reported <u>immediately</u> to the local health department.

This report is sent monthly. Please feel free to contact us if you have any questions or concerns regarding this report.
