

# Infection Prevention and Control

## Personal Protective Equipment (PPE) Checklist

The Center for Disease Control and Prevention’s *Core Infection Prevention and Control Practices for Safe Healthcare Delivery in All Settings* recommend having PPE supplies well-stocked and easy to access prior to room entry. This checklist has been developed to assist in ensuring PPE supplies are stocked and easily accessible prior to room entry. When using this document, consider assigning a member of your healthcare personnel team to check each area/room caddy/hall every shift to confirm they are adequately stocked.

Hall/Room	Initials	Date/Time	Signage at Room Entry	Lidded Trash Receptacle Available	Number of Gowns Available	Number of Boxes of Gloves Available	Number of N95 Available	Number of Surgical Masks Available	Hand Sanitizer Readily Accessible	Eye Protection Available	Eyewear Cleaner/Disinfectant Available
