

# Outbreak Report for August 2019 West Virginia

During the month of August 2019, there were seven outbreaks reported in West Virginia. Of the seven reported, five (71%) were confirmed as outbreaks, one was investigated and determined not to be an outbreak, and one is under ongoing investigation. Four were reported from healthcare facilities and one from a correctional facility.

Of the four healthcare-associated outbreaks, three (75%) were reported from long-term care facilities (LTCF) and one from an assisted living facility (ALF).

The rest of this report describes the types and settings of the outbreaks. All data provided is provisional.

## Respiratory Outbreaks During the Month of August 2019 (n=1)

Type of Outbreak or Cluster	Number of Outbreaks	Outbreak Setting	Laboratory Testing	Number of Cases

## Outbreak Report for August 2019 West Virginia

The West Virginia Department of Health and Human Resources, Bureau for Public Health (BPH) continues to investigate cases of hepatitis A in the state as part of the multi-state outbreak that is occurring nationally. Persons who use injection and non-injection drugs, persons with unstable housing or who are homeless, persons with recent history of incarceration, and men who have sex with men are considered at considerable risk for infection. Vaccination of high-risk groups continues to be an important strategy in preventing new cases. Additional information on this outbreak, including the current number of cases, can be found at [www.hepawarewv.org](http://www.hepawarewv.org).

For information on outbreak guidelines or any disease or condition, please visit the Division of Infectious Diseases Epidemiology's website at [www.dide.wv.gov](http://www.dide.wv.gov) or call (304) 558-5358 ext. 1, or toll-free in West Virginia 1 (800) 423-1271 (24/7/365).

Remember that outbreaks should be reported immediately to the local health department.

This report is sent monthly. Please feel free to contact us if you have any questions or concerns regarding this report.
